

WP2 presentation of the Canva poster task on climate change prepared by the Turkish students

https://www.canva.com/design/DAFinvAha28/s_GdmURmozaXpFMsB0fAcQ/edit

While preparing the poster, we thought about what to put in its content?

While preparing our poster, we included photos, information and data about climate change, in short, things that describe climate change.

What's on Canva on climate change?

Canva has many templates, posters, presentations, symbols and Instagram posts about climate change.

What kind of template did we choose in canva?

We chose to make a poster to explain this problem on canva

What did those who saw our digital poster think?

Those who saw our digital poster thought that this poster was an educational and scientific study, as we explained climate change in detail and could attract people's attention on this issue.

What is climate change?

- Decline of glaciers
- Show of rain intensity and evaporation
- A large amount of rain in the form of a storm
 - High speed increase of forest fires
- The fact that natural events such as storms and floods are more experienced
 - The color of the corals turns white
 - Sea level rise
 - Shrinking sea glaciers

How does climate change affect Burdur Lake?

What should we do to slow climate change?

- We should use solar panel
- We should use public transport
- We must reduce fossil fuel consumption
- We should plant a tree and protect the green spaces
- We should install filters in places like factory chimneys
